SUMMARY

AI engineer and studio founder building websites, apps, and automations for paying clients, seeking AI engineering roles, with a production AI voice platform handling live client calls and a point-of-sale system in daily use at a retail bakery.

Founder of Lexmakesit (Sep 2025 to present), a solo studio serving client businesses as designer, engineer, and sole technical support contact. Ships and operates production systems on self-hosted Linux and Docker infrastructure and in the cloud, with shipped projects carrying more than 2,700 automated tests.

EXPERIENCE

Founder and Lead Engineer, Lexmakesit Sep 2025 to Present
Independent software studio, Paterson, NJ

- Design, build, and deploy custom websites, apps, and automations for paying clients in Python, TypeScript, React and Next.js, React Native, FastAPI, PostgreSQL, and Docker, owning each engagement end to end.
- Built an AI voice-receptionist platform integrating Twilio, the OpenAI Realtime API, and RAG retrieval over Qdrant with PostgreSQL and Redis, deployed on DigitalOcean; the system answers live client calls for intake and appointment scheduling.
- Operate the self-hosted Linux and Docker infrastructure running client systems, with containerized deployments, Caddy HTTPS routing, health checks, and smoke-tested gated releases, keeping client applications in daily use.
- Serve as the sole technical support contact for client businesses and author onboarding documentation and pilot agreements, moving new clients from signup to live use.

Software Developer, La Jarochita Bakery 2026
Client engagement, Passaic, NJ

- Built BakeryPOS, a point-of-sale and inventory system in .NET 8, WPF, and SQLite, delivered as paid client work; the system runs the bakery's daily sales in production.
- Handled all technical support for the client as its sole support contact, resolving issues directly on the live production system.

Software Developer, Innovation Development Solutions Feb 2026 to Present
Client engagement, North Jersey

- Build and maintain the company's client-facing website in Next.js on Vercel with a git-push deployment workflow, shipping ongoing content updates to the live site.

SELECTED PROJECTS

Vendora, Reseller Operations App vendora.lexmakesit.com

- Built a React Native and Expo inventory and sales app with barcode scanning, item-level profit and loss, and PDF invoices, backed by a FastAPI, SQLAlchemy, and PostgreSQL API with JWT authentication and Alembic migrations.
- Integrated Stripe payments with idempotent webhooks, eBay and StockX synchronization, and Lightspeed POS integration, so resellers manage listings, sales, and payouts in one place.
- Automated testing and releases with pytest, Playwright, GitHub Actions, Docker Compose, and Expo Application Services, reaching 1,043 backend tests at 95.8% coverage and 503 mobile tests.

Agentops, Local-First Multi-Agent Platform github.com/as4584

- Developed a local-first multi-agent control center with FastAPI, LangGraph, Ollama, and Next.js for running and observing AI agents on self-hosted hardware; the project documents 1,165+ automated tests in its repository.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C#, SQL, HTML/CSS
Frontend and Mobile: React, Next.js, React Native, Expo
Backend and Data: FastAPI, SQLAlchemy, Alembic, PostgreSQL, SQLite, Redis, Qdrant, REST APIs
AI: OpenAI APIs (Realtime API, GPT-4), RAG, LangGraph, Ollama
Infrastructure: Docker, Docker Compose, Linux, Caddy, DigitalOcean, Vercel, GitHub Actions, CI/CD
Integrations and Testing: Twilio, Stripe, eBay, StockX, Lightspeed POS, pytest, Playwright

EDUCATION

Passaic County Community College, Associate of Science in Computer Science, in progress Expected Fall 2027
New Jersey Institute of Technology, Computer Science coursework, no degree 2023 to 2025
